Dermatologic Disorders

Approach to the Unknown Rash

TH-299 / 1 Hour

Faculty: Heather M. Murphy-Lavoie, MD

Thursday, October 11 / 11:00 AM - 11:50 AM

How do you approach the unknown rash? Knowing how to identify and classify a skin lesion is an essential component in developing a systematic and organized approach to any lesion. The speaker will present guidelines for the proper diagnosis of various dermatologic conditions using case presentations to illustrate these concepts.

Classic Pediatric Rashes

TU-162 / 1 Hour

Faculty: Ghazala Q. Sharieff, MD, FACEP

Tuesday, October 9 / 5:00 PM - 6:00 PM

Do children with rashes still stump you? The speaker will review pediatric rashes, from classic childhood exanthemas to unusual and life-threatening cutaneous disorders. Using a case-based format, measles, varicella, roseola, Kawasaki's disease, impetigo, and staphylococcal scalded skin syndrome will be discussed.

Cocktail Party Conversations: Hey Doc, What's This?

WE-253 / 30 Minutes

Faculty: Emily A. Rose, MD

Wednesday, October 10 / 4:30 PM - 4:55 PM

Ever been at a party and get asked to identify that unknown lesion or rash someone's had for days, months, or years? What you learn during this case-based presentation will make you the star of the party! The speaker will describe how to recognize ten common and clinically significant rashes as well as look-alike rashes. The appropriate management and disposition of each rash will be discussed. In addition, pearls for distinguishing look-alike rashes will be presented.

The Death Rash: Lethal Rashes You Can't Miss

TH-273 / 1 Hour

Faculty: Heather M. Murphy-Lavoie, MD

Thursday, October 11 / 8:00 AM - 8:50 AM

Many patients who present to the ED with the complaint of a rash are not in immediate danger. A concerning minority, however, have life-threatening disorders that require immediate recognition and treatment if they are to have any chance of survival. From autoimmune to infectious disorders, the speaker will identify rashes you cannot miss!

Manifestations of Irritations from Infestations: Icky Creatures and Bites

MO-58 / 1 Hour

Faculty: Gil Z. Shlamovitz, MD

Monday, October 8 / 4:00 PM - 4:50 PM

Many patients present to the ED with a variety of bites and infestations including bedbugs, lice, scabies, maggots, and crabs. The speaker will review the difference between each, how they present, and current treatment strategies for all.

Recognizing the Top Ten Pediatric and Adult Rashes

WE-209 / 1 Hour

Faculty: Emily A. Rose, MD

Wednesday, October 10 / 12:30 PM - 1:20 PM

What is it, and what can I do about it? This is what emergency physicians really want to know when faced with a patient who has a rash. The speaker will describe how to recognize ten common and clinically significant rashes as well as look-alike rashes. The appropriate management and disposition of each rash will be discussed. In addition, pearls for distinguishing look-alike rashes will be presented.
