

2012 Scientific Assembly Course Descriptions

Urologic & OB/GYN Disorders

Best Practices in Approach to Sexual Assault

WE-206 / 1 Hour

Faculty: Joelle Borhart, MD

Wednesday, October 10 / 12:30 PM - 1:20 PM

Violence continues to plague our environment, and emergency care providers are on the front lines of caring for survivors of assault. Several recent legislative initiatives at the Federal and State levels have changed the landscape and directly impact our approach to survivors of assault. The speaker will provide important updates regarding forensic evidence collection "SANE exam", as well as updates in the approach to drug facilitated sexual assault.

Emergency Delivery: Are You Prepared?

WE-231 / 1 Hour

Faculty: Carrie D. Tibbles, MD

Wednesday, October 10 / 3:00 PM - 3:50 PM

No matter how "naturally" a pregnant woman delivers her child, if it's in your ED, it becomes an emergency delivery. The speaker will discuss the management of the complications associated with an emergency delivery, identifying necessary equipment, and identifying patients who cannot be transferred to labor and delivery. Are you and your facility prepared for this event?

From X-Rays to Antiemetics: Difficult Decisions in the Pregnant Patient

MO-06 / 1 Hour

Faculty: Alfred D. Sacchetti, MD, FACEP

Monday, October 8 / 8:00 AM - 8:50 AM

In no other patient are the risk/benefit decisions for emergency physicians more difficult than the pregnant patient. Through presentation of both common and high-risk clinical scenarios, the speaker will explore the realistic potential radiation dangers associated with ED radiographic studies as well as the teratogenic or physiologic effects of frequently utilized medications.

Half-Baked: Emergencies in the Second Trimester of Pregnancy

TH-284 / 1 Hour

Faculty: Kevin C. Reed, MD, FACEP

Thursday, October 11 / 9:00 AM - 9:50 AM

Managing the pregnant patient at the cusp of viability is challenging. Rapidly and accurately determining fetal viability is crucial and can radically change the management of your patient. The speaker will discuss strategies to determine fetal viability both in utero and after delivery. The basic approach to preterm labor, bleeding, and resuscitation of the mid-pregnancy patient also will be covered.

Third Trimester and Postpartum Disasters

TU-146 / 1 Hour

Faculty: Carrie D. Tibbles, MD

Tuesday, October 9 / 3:00 PM - 3:50 PM

Third trimester and postpartum complications can be an infrequent, stressful, and challenging for the emergency physician. The speaker will highlight the presenting symptoms

and latest advances in the treatment of pregnancy-induced hypertension, preeclampsia, eclampsia, cardiomyopathy, bleeding/previa, abrupt placenta, and early labor. A review of the most recent literature pertinent to these diseases in pregnancy and the postpartum also will be discussed.

Visual Diagnosis: Genitourinary Emergencies & Procedures

MO-25 / 1 Hour

Faculty: Gil Z. Shlamovitz, MD

Monday, October 8 / 12:30 PM - 1:20 PM

Genitourinary (GU) conditions may produce a high level of anxiety not only for the patient, but also for the healthcare provider. The presenter will take you on a case-based visual odyssey, covering both the common as well as the can't miss fertility or life-threatening GU conditions. Proper techniques, pearls and avoidable pitfalls for success in essential GU procedures also will be covered.

MO = Monday TU = Tuesday WE = Wednesday TH = Thursday
