Reminder

Activity 8 "Benchmarking II" - Due Today

Complete data submission by the deadline in order to receive a personalized Benchmarking II Report.

Quality Tip of the Month

“Intravenous acetaminophen might be considered for pain control in the ED on case-by-case basis when PO/PR routes are contraindicated, other analgesics are not tolerable, patients have high risk of developing opioid and NSAID’s-related adverse effects, and when multimodal analgesia is desired.”

Sergey Motov, MD

Maimonides Medical Center
