Head & Neck Disorders

- **Slit Lamp Skills Lab**  
  10/27/2019 8:00 AM - 10:00 AM  
  SU-3  
  *Faculty: Christine Babcock, MD, FACEP (Moderator)*  
  During this hands-on lab, participants will rotate among three stations & the basics of slit lamp equipment & examination for the emergency physician will be described. Stations will include removal of foreign bodies from simulated eyes, a review of application & use of different types of tonometers, & review of a slide show to present & discuss various ophthalmologic pathologies. (This lab is limited to 35 participants)

- **Hardware Headaches: Complications of Central Nervous System Devices**  
  10/27/2019 12:00 PM - 12:25 PM  
  SU-19  
  *Faculty: Tina Choudhri, MD*  
  Cochlear implants, vagus nerve stimulators, cleft palates, PE tubes, trach, & the list continues to get longer. This course will address the various issues that are associated with the progress made in treating the patient with the variety of specialized HEENT hardware. This course will range from pediatrics to geriatrics & provide the comprehensive review which will allow you to take care of the whole patient.

- **Slit Lamp Skills Lab**  
  10/27/2019 12:30 PM - 2:30 PM  
  SU-33  
  *Faculty: Christine Babcock, MD, FACEP (Moderator)*

• **Fixing Faces Painlessly: Facial Anesthesia, Regional Blocks**  
  10/27/2019 3:30 PM - 4:20 PM  
  SU-67  
  *Faculty: Tina Choudhri, MD*  
  Facial wounds can be a frightening & painful experience for the patient. Using illustrative cases, the presenter will describe the anatomic approach to facial nerve blocks. These blocks may be used for local anesthesia to repair such regional facial trauma as eyelid lacerations or oral trauma & dental pain.

• **Bones, Beads, & Beans: ENT Foreign Bodies**  
  10/27/2019 3:30 PM - 3:55 PM  
  SU-59  
  *Faculty: Robert M. Hughes, DO*  
  With any orifice there is always a possibility something will get stuck. This session will review the latest tips & tricks for removing foreign bodies from the ears, nose, & throat with as little pain as possible on you & the patient!

• **Discharge or Disaster? Differentiating Between Harmless & Dangerous Causes of the Acute Red Eye**  
  10/27/2019 5:00 PM - 5:30 PM  
  SU-87  
  *Faculty: Megan Boysen Osborn, MD, FACEP*  
  While many patients with the acute red eye can be safely discharged home, others must be emergently treated & referred to ophthalmology. This session will focus on how five historical & physical examination features can distinguish between benign & sight-threatening diagnoses. The instructor will present cases of the acute red eye, focusing on six “can’t miss” diagnoses.
Managing Dental Emergencies Like a Pro
10/28/2019 3:30 PM - 3:55 PM
MO-180
Faculty: Joan Noelker, MD
While dental pain is a common complaint in the ED, managing it skillfully can still be a challenge. There is more to consider than merely cavities. The presenter will discuss the common & emergent conditions that should be considered. Management strategies to help avoid the ubiquitous narcotic prescriptions will be addressed.

Nebulous Neck Masses: A Difficult Differential Diagnosis
10/28/2019 5:00 PM - 5:30 PM
MO-208
Faculty: Herbert E. Hern, MD, FACEP
Neck masses can have many differential diagnosis. The speaker will review the tips & tricks of teasing out the differences & getting the patient what they need as far as next steps.

Nontraumatic Vision Loss
10/29/2019 12:30 PM - 12:55 PM
TU-262
Faculty: Jacob Avila, MD
Vision loss can have a multitude of causes & myriad of treatment methods. This lecture aims to shed light on the management, treatment, & disposition of non-traumatic vision loss.

The Airway Triple Threat: Allergy, Anaphylaxis & Angioedema
10/29/2019 1:30 PM - 2:20 PM
TU-289
Faculty: Herbert E. Hern, MD, FACEP
This course will give you a case-based look at the new literature & treatment recommendations for common & life-threatening airway emergencies. One of the leading experts in the field will guide you through the most recent developments in the diagnosis & treatment of angioedema, anaphylaxis & allergy related emergencies. You will walk out of this course with more confidence about airway emergencies & a good handle on the current guidelines for treatment.

Infections in Small Places: Managing Mastoiditis, Orbital Cellulitis, & Neck Abscesses
10/29/2019 3:30 PM - 3:55 PM
TU-299
Faculty: Joan Noelker, MD
Infections in the head & neck area are common, but can also become rather complicated given the delicate & small locations in which they occur. The presenter will discuss the current evidence-based strategies for both diagnosis & management of these important conditions.
• More Than A Poke To the Eye: Traumatic Eye Injuries
  10/29/2019 4:30 PM - 4:55 PM
  TU-316
  Faculty: Jacob Avila, MD
  The traumatic eye injury can be intimidating for the non-ophthalmologist. The speaker will discuss common treatments & dispositions for ocular injuries ranging from corneal abrasions to globe ruptures & everything in between.

• Nightmare ENT Emergencies: Sore Throats That Can Kill
  10/30/2019 8:00 AM - 8:50 AM
  WE-360
  Faculty: Teresa S. Wu, MD, FACEP
  At any hour patients can appear crying out for rapid diagnosis & life-saving procedures creating a nightmare for your ED. The speaker will lead you through a myriad of bleeding & swollen ENT monster. Tricks & treats will be tossed into your bag to help you & your patient survive the next ENT nightmare.

• Quick Tips: ENT Procedures in the ED
  10/30/2019 9:30 AM - 9:55 AM
  WE-345
  Faculty: Christopher J. Gelabert, MD, FACEP
  How many times do you face a patient with a dislocated jaw? An infected parotid gland? A peritonsillar abscess? Facial injury or infection may result from a variety of emergent issues. During this interactive case-based discussion, the speaker will describe a rapid approach to diagnose or resolve various conditions. Subtle clinical red flags & key steps in the effective diagnosis will be presented. Essential management steps will be outlined for immediate use on your next shift in the ED.

• Post-Tonsillectomy Hemorrhage: This Is Gonna Be a Bloody Nightmare
  10/30/2019 9:30 AM - 9:55 AM
  WE-343
  Faculty: Herbert E. Hern, MD, FACEP
  Tonsillectomy is a common surgery for young children with sleep-disordered breathing or recurrent sore throats & even found in the adult patient with prolonged pharyngeal issues. While the bleeding may appear minor, it may be a harbinger for disaster. The child who presents with active bleeding can be a test for even the most seasoned of veteran practitioners. The presenter will discuss some helpful strategies to avoid peril.
