Liability Concerns & Controversies Working with Non-physician Providers
10/25/2021 | 8:30:00 AM - 9:00:00 AM

Non-physician provider supervision and incurred liability is a frequent concern expressed by ACEP physicians. An physician-attorney and non-physician provider will co-present with an experienced non-physician provider to address: NPP training, supervising physician liability, and independent practice.

- Discuss liability risks associated when working with NPPs, including case examples of when a physician was and was not named in a lawsuit.
- Understand requirements and standards for supervision of NPPs, and understand training/qualifications of PAs and NPs.
- Discuss/debate pros and cons of independent practice of NPPs and variations in state laws.

National Practitioner Data Bank: Opening Pandora’s Box
10/25/2021 | 8:30:00 AM - 9:00:00 AM

Events reported to the NPDB affect all future licensing and credentialing. What events are reported? Is your report accurate or can it be corrected? What actions can be taken to avoid reporting or craft mutually agreed upon the language to mitigate future professional damage?

- Identify events.
- Review report and correct/amend.
- Use of counsel to craft language
18 years...kid has got you for 18 years! The pediatric-emergency medicine physician attorney speaker will identify high risk areas of medical malpractice unique to pediatric patients, discuss liability linked to use of consultants, and address duty to warn differences specific to our pediatric patient population.

- Discuss high risk areas of malpractice in pediatrics.
- Identify legal concepts unique to pediatric patients, including liability involving consultants.
- Introduce the legal concepts of duty to warn in prescribing, and foreseeability in pediatrics.

The black box drug list seems to be growing yet we are constantly faced with drug shortages limiting our choices when caring for patients in the ED. Many of us have used these drugs extensively in the past & feel quite comfortable with continuing this use on our patients. What is our risk when we do this? Is it a reasonable risk? The speaker will summarize black box warnings on drugs frequently used in the ED, assess the risk of this continued use, justify appropriate use in specific patients, & identify critical documentation needed when choosing to use these drugs.

- Summarize black box warnings on drugs frequently used when caring for patients in the ED.
- Assess the risk of continued use of these drugs despite these warnings.
- Justify appropriate continued use of black box drugs in the context of specific patients presented through a case-based approach.
Emergency medicine is a high risk specialty. Recognizing these five predictable sources of medical malpractice claims and lawsuits in addition to cultivating practice and documentation strategies reduces the risk of becoming a defendant!

- Briefly discuss risk to the EDP associated with AMA, informed consent, end-of-shift handoff, consultation, and discharge instructions via a case or documentation based example.
- Give example of actions, strategies, or documentation pearls that decrease the EDP's legal risk in each of these examples.

Every major EM organization signed a letter to CMS demanding physician due process rights. Does your current contract force you to waive your due process rights? Did you agree to provide reimbursement to your employer whose negligence may have contributed to your patient's injuries by signing an indemnification clause? Can you work for the across town competitor ED or are you bound by a non-compete clause?

- Discuss due process rights and medical professional organizations' fight to maintain them for their members.
- Define indemnity clauses and their possible negative effects on EM physicians. Suggest alternative or edited contract language.
- Review non-compete clauses and any pertinent case law that may apply to EM physicians.
