Alphabet Soup

- Medicare Access and CHIP Reauthorization Act
- Quality Payment Program
- Merit Based Incentive Payment System
What's the Quality Payment Program?

The Quality Payment Program improves Medicare by helping you focus on care quality and the one thing that matters most — making patients healthier.

The Quality Payment Program has two tracks you can choose:

1. Advanced Alternative Payment Models (APMs)
2. The Merit-based Incentive Payment System (MIPS)

Start anytime between January 1 and October 2, 2017.
Performance data is submitted by March 31, 2018.
MIPS vs. AAPM

- For Emergency Medicine – MIPS, MIPS, MIPS
- Limited aAPM opportunities
  - Multi-specialty group
  - MSSP Track 2 or Track 3 or Next Generation ACO
Performance:
The first performance period opens January 1, 2017 and closes December 31, 2017. During 2017, record quality data and how you used technology to support your practice. If an Advanced APM fits your practice, then you can join and provide care during the year through that model.

Send in performance data:
To potentially earn a positive payment adjustment under MIPS, send in data about the care you provided and how your practice used technology in 2017 to MIPS by the deadline, March 31, 2018. In order to earn the 5% incentive payment by significantly participating in an Advanced APM, just send quality data through your Advanced APM.

Feedback:
Medicare gives you feedback about your performance after you send your data.

Payment:
You may earn a positive MIPS payment adjustment for 2019 if you submit 2017 data by March 31, 2018. If you participate in an Advanced APM in 2017, then you may earn a 5% incentive payment in 2019.
Pick Your Pace in MIPS

If you choose the MIPS path of the Quality Payment Program, you have three options.

- **Don’t Participate**
  
  Not participating in the Quality Payment Program:
  If you don’t send in any 2017 data, then you receive a negative 4% payment adjustment.

- **Submit Something**
  
  Test:
  If you submit a minimum amount of 2017 data to Medicare (for example, one quality measure or one improvement activity for any point in 2017), you can avoid a downward payment adjustment.

- **Submit a Partial Year**
  
  Partial:
  If you submit 90 days of 2017 data to Medicare, you may earn a neutral or small positive payment adjustment.

- **Submit a Full Year**
  
  Full:
  If you submit a full year of 2017 data to Medicare, you may earn a moderate positive payment adjustment.
Big Money

How much can MIPS adjust payments?

+/- Maximum Adjustments

+4%  +5%  +7%  +9%

-4%  -5%  -7%  -9%

2019  2020  2021  2022 onward

(Graphics from the Centers for Medicare & Medicaid Services.)
MIP: 4 categories

- Transition from Participation to Results

Calculating MIPS Composite Performance Score

- 2017: 60% Quality Performance, 25% Advancing Care Improvement, 15% Clinical Practice Improvement Activities, 10% Cost Performance
- 2018: 50% Quality Performance, 25% Advancing Care Improvement, 15% Clinical Practice Improvement Activities, 10% Cost Performance
- 2019: 30% Quality Performance, 25% Advancing Care Improvement, 30% Clinical Practice Improvement Activities, 15% Cost Performance
What is MIPS?

Participating in MIPS will earn you performance-based payment adjustments of up to 9% of your Medicare payment.

Most emergency clinicians will only be measured on Quality and CPIA for 2017.

- Quality
- Clinical Practice Improvement Activities
- Resource Use
- Advancing Care Information
CMS Estimates Emergency Medicine Participation in MIPS

• 67,469 MIPS eligible clinicians
  • Exclude 4.4% newly enrolled
  • Exclude 0.5% advanced APM
  • Exclude 33% low volume

• 62% of all emergency medicine clinicians in MIPS
  • Average annual Part B charges: $65,414
What is CPIA?

Clinical Practice Improvement Activities (CPIA) must be attested to by groups and clinicians as evidence of active efforts to improve quality and reduce the cost of care.

2017 CPIA Goal: Maximum 40 points can be earned

2018 CPIA Goal: Maximum 60 points can be earned

2019 CPIA Goal: Maximum 60 points can be earned
CPIAs 2017

• 92 possible activities, few EM specific

• Medium (most) or High (few) weight
  • Medium = 10 points
  • High = 20 points
CPIA Scoring

\[
\text{CPIA High Points} + \text{CPIA Medium Points} = \text{Total CPIA Points}
\]

\[
\text{Total CPIA Points} \div \text{Total Possible CPIA Points} = \text{CPIA Performance Category Score}
\]

\[
\text{CPIA Performance Category Score} \times 15\% \text{ CPIA Weight} = \text{Points Toward MIPS Composite Score}
\]
CPIA Strategy

• If you get maximum points, scoring doesn’t matter

• 100% CPIA score key to better total MIPS Score

• EQUAL: Minimize burden and Maximize Value
  • Clinically relevant activities
  • Leverage existing QI work
  • Support hospital partners
  • One stop shopping
### E-QUAL Activities

<table>
<thead>

</tr>
</tbody>
</table>

### Additional CPIA points available by implementing each E-QUAL Core Activity Best Practices

| Use of decision support and standardized treatment protocols (PSPA 16) | 10 points |
| Engage patients and families in system of care (BE 14) | 10 points |
| Implement Analytic capabilities to manage total cost of care (PSPA 17) | 10 points |
| Disseminate patient self-management and engagement materials (BE 21) | 10 points |
| Develop standard care coordination agreements and operational improvements (CC 11, CC 12) | 10 points |
| Use evidence-based decision aids for shared decision making (BE 12) | 10 points |

Sepsis Wave II Activity 5: Commit to Data Driven Best Practices

Multiple quality improvement interventions are needed to improve sepsis outcomes, and no one intervention will work in every ED, however several best practices for screening, management, and reassessment have been presented in Sepsis Wave II.

Your ED has collected data, benchmarked performance, and assessed clinician readiness for change and improvement—so how will you transform sepsis care?

Activity 5 requires attestation to specific best practice implementation and submission of evidence of intervention aligned to CMS Clinical Practice Improvement Activities.

Please note: Your ED should submit as many examples of quality improvement best practices in Activity 5 and Activity 8. These activities will be summarized in your final EQUAL Sepsis Wave II Certificate to support your ED’s attestation for multiple CPIA credits.

Which of the following screening best practices has your ED implemented?

- Nursing sepsis screen (structured tool at bedside or triage)
- Electronic Health Record (EHR) decision support to alert clinicians to patients with possible sepsis (upload screen shot without PHI)

Upload screen shot of report or dashboard (no PHI)

Which of the following treatment best practices has your ED implemented?

- Deployment of early, routine lactate testing (e.g. sent on arrival, or point-of-care)
- Electronic Health Record (EHR) decision support to standardize sepsis management or bundle compliance (upload screen shot without PHI)

Upload screen shot of report or dashboard (no PHI)

E-QUAL CPIA Opportunity

• Participating and completing the activities in one learning collaborative can fulfill the 40 point CPIA requirement for 2017

• Participating in one learning collaborative is considered a full year improvement activity.
  • Submit via QCDR, CMS Web Interface, or attestation

• At the end of the learning collaborative site champions will receive a certificate to attest participation in E-QUAL for CPIA credit.

• CEDR participants may also receive auto-submission of CPIA
E-QUAL and MIPS FAQs

• What performance data is submitted to CMS?

• If a site participates in more than one learning collaborative can the site be eligible for a bonus in 2019?

• Do I need to participate in EQUAL and CEDR?

• What about 2018?
