The Hon. Brad Wenstrup 2335 Rayburn House Office Building Washington, DC 20515

The Hon. Greg Murphy 407 Cannon House Office Building Washington, DC 20515

The Hon. Michael Burgess 2161 Rayburn House Office Building Washington, DC 20515

Dear Representatives Wenstrup, Murphy, and Burgess:

The undersigned national medical organizations and state medical societies deeply appreciate your leadership in drafting a proposal to reform the budget-neutrality policies that have been eroding Medicare physician payment levels in recent years. Your October 4 draft legislation would add needed stability and predictability to Medicare physician payments.

As one of the few Medicare providers without a payment update tied to inflation, physicians have watched inflation-adjusted payments decline 26% from 2001 to 2023. Physician payments are further eroded by frequent and large payment redistributions caused by statutory mandates for the Centers for Medicare and Medicaid Services (CMS) to make refinements to fee schedule service valuations and coding policies subject to budget neutrality. Unfortunately, it is not uncommon for CMS to overestimate utilization assumptions related to code revaluations in its budget neutrality estimates. The most prominent example of this occurred when transitional care management (TCM) services were added to the Medicare Physician Fee Schedule in 2013. CMS estimated 5.6 million new claims would be submitted for these services. Actual utilization, however, turned out to be just under 300,000 claims for the first year and it was still less than one million claims after three years. As a result of this overestimation for TCM services alone, Medicare physician payments were reduced by more than \$5.2 billion from 2013 to 2021. Once these redistributions are made through the conversion factor they are not added back, even when actual utilization is far lower than projected. The net result in these circumstances is not budget neutrality, but rather permanent and unjustifiable Medicare cuts to physician payments across-the-board.

By providing a lookback period that would allow CMS to reconcile erroneous utilization projections based on actual claims, your proposal would allow the Medicare conversion factor to be re-adjusted as appropriate, while simultaneously plugging this "leak" in the Medicare physician payment pool. Your proposal would also update the spending threshold that spurs the need to apply a budget neutrality adjustment. The current threshold of \$20 million was enacted into law in 1989, when total Medicare spending was far lower. Provisions raising this amount to \$53 million and increasing it every 5 years by the cumulative increase in Medicare Economic Index (MEI) allow for greater flexibility in determining pricing and policy changes for services without triggering across-the-board cuts.

Finally, starting in 2025, the proposal would require the Secretary to limit positive or negative budget neutrality adjustments to the conversion factor to 2.5% each year, which will provide greater stability for the Medicare physician payment system by removing relatively large and abrupt changes in conversion factor calculations.

Thank you once again for your commitment to Medicare physician payment reform. Enactment of the policies in the discussion draft, combined with other reforms such as an annual payment update tied to inflation, promise to improve the financial viability of physician practices—particularly those in rural and underserved areas. We look forward to working with you and your colleagues in this endeavor.

Sincerely,
