

Manual Uterine Aspiration Supplies Ordering Suggestions

Supplies list for procedure:

- Gurney with gynecological stirrups
- Metal speculum (better able to size aperture to give more room for equipment and procedure than plastic speculum)
- Ringed forceps
- Tenaculum (for gripping cervix and better control and safety during procedure)
- Betadyne & sterile cotton balls or 2x2 gauze (for applying betadyne to cervix)
- Long oversized cotton swab/qtips (i.e. "Scopettes")
- For paracervical block:
 - 20cc lidocaine 1%
 - Control syringe
 - Spinal needle or needle extender
- Either [HPSRx Miscarriage Kit](#) w following items or source items individually:
 - Manual vacuum aspirator
 - 3 double-sided (5/6mm, 7/8mm & 9/10mm) Denniston dilators
 - Plastic cannulae (6mm, 7mm, 8mm & 9mm)
- Sterile cup (for products of conception)
- Maxi pad or pantiliner for patient post procedure

Explanation of aspirators and where to source aspirators:

- The double Valve (blue topped) aspirator is single use and what most EDs stock: Item code DVSSU on HPSRx website (<https://www.ipasmva.com/aspirators-1>)
- DKT WomanCare Global produces the MVA (manual vacuum aspirator - name used on their website) aspirators
- HPSRx is the distributor of the manual uterine aspirator in the US:
 - Miscarriage Management MVA kits with the single use Ipas double valve uterine aspirator, 3 double-sided (5/6mm, 7/8mm & 9/10mm) Denniston dilators and 6mm, 7mm, 8mm & 9mm cannulae are sold for \$98/kit (as of June 2025)
 - Website here: <https://www.ipasmva.com/miscarriage-kits>
