Nathan J. Hudepohl MD, MS, MPH

Director of Quality and Patient Safety for Brown Emergency Medicine at Alpert Medical School in Providence, RI. Among other quality improvement projects he has led efforts in imaging reduction and sepsis management. He is responsible for developing an imaging reduction plan for low back pain in cooperation with the Rhode Island Quality Institute, the department of radiology, and emergency departments throughout the state. He worked with the ICU and IT to develop a system of provider alerts in the electronic medical record implemented throughout the healthcare system to improve compliance with the CMS sepsis bundle.

Dr. Nathan Hudepohl completed medical school at Tufts University and residency in Emergency Medicine at the University of Cincinnati. Dr. Hudepohl supervises the quality improvement group responsible for ensuring patients receive appropriate treatment and follow-up after a visit to the emergency department. He works with medical students and residents conducting quality improvement projects in the emergency department. He is co-director for Leadership in Healthcare, a medical school course focused on developing leadership capabilities in future healthcare leaders. He works with community healthcare leaders supporting projects aimed at improving patient care to optimize health while reducing unnecessary healthcare costs.
