Human Trafficking and the Mass General Human Trafficking Initiative

Wendy Macias-Konstantopoulos, MD, MPH informed the section that there are roughly 20.9 million human trafficking victims worldwide. More than \$150 billion in profit is derived from the practice of human trafficking. According to the U.S. department of Justice 95% of labor traffickers are undocumented immigrants. Many victims of human trafficking flow through the ED and are unrecognized by providers as victims. Dr. Macias-Konstantopoulos noted that it has been difficult to get articles published in journals and there have been no large studies on human trafficking in the US.
