

Select ACP Clinical Resources on Opioids

Title of Resource	Learning Objectives	Location (link to resource)	Access (free, registration required, etc.)	Notes (CME credits, other?)
Caring for Patients with Chronic Pain Treating with Opioids: Balancing the Benefits and Risks [Providers' Clinical Support System for Opioid Therapies]	<ul style="list-style-type: none"> -Considering appropriate factors before starting opioids -Using best practices to start opioids -Understanding when to continue opioids -Stopping opioids effectively 	https://www.acponline.org/meetings-courses/focused-topics/providers-clinical-support-system-for-opioid-therapies	Free	No CME/MOC CME offered thru AAAP
Chronic Pain Management	<ul style="list-style-type: none"> - Determine if your practice is fully prepared to manage patients experiencing chronic pain. - Learn appropriate components of a chronic pain care plan, and utilize provided tools and forms to ensure proper documentation. 	https://www.practiceadvisor.org/Modules/improving-clinical-care#	Free for PTN-enrolled practices	20 MOC points
Addiction: Clinical Challenges and Management Strategies	<ul style="list-style-type: none"> Learn about factors that influence the experience of pain in patients with a history of opioid addiction. - Recall the complexities of diagnosing opioid addiction in patients on chronic opioids for chronic pain. - Recall the evidence supporting the management of opioid use disorders with medications. 	https://www.acponline.org/cme-moc/online-learning-center/chronic-pain-and-opioid-addiction-clinical-challenges-and-management-strategies	Free	No CME/MOC

	- Apply a practical framework for managing patients with concurrent pain and opioid addiction.			
How Would You Manage Opioid Use in These Three Patients?		http://annals.org/aim/fullarticle/2614122/how-would-you-manage-opioid-use-three-patients-grand-rounds	Free	5 CME/MOC
Patient Outcomes in Dose Reduction or Discontinuation of Long-Term Opioid Therapy: A Systematic Review		https://annals.org/aim/article/2643842/patient-outcomes-dose-reduction-discontinuation-long-term-opioid-therapy-systematic	Free	1 CME/MOC
SAFE Opioid Prescribing: Strategies. Assessment. Fundamentals. Education.	<ul style="list-style-type: none"> - Implement patient assessment strategies, including tools to assess risk of abuse, misuse, or addiction when prescribing extended-release (ER/LA) opioids. - Employ approaches to safely initiate therapy, modify dose, and discontinue ER/LA opioids. - Monitor patients by evaluating treatment goals and implementing periodic urine drug testing (UDT). - Employ patient education strategies about the safe use of ER/LA opioids. - Identify similarities and differences among ER/LA opioids. 	https://www.acponline.org/cme-moc/online-learning-center/safe-opioid-prescribing-strategies-assessment-fundamentals-education	Free	3.5 CME/MOC
Pain and Mental Health Assessments	<ul style="list-style-type: none"> - Why should we assess pain and mental health? - What tools are good to assess pain including the Brief Pain Inventory (BPI)? 	https://www.acponline.org/practice-resources/quality-improvement/chronic-pain-and-safe-opioid-prescribing/pain-and-mental-health-assessments	Free	No CME/MOC

Pain Assessments and Mental Health Screenings	<ul style="list-style-type: none"> - Understand evidence-based guidelines for effective use and implementation of pain assessment tools - Understand evidence-based guidelines for effective use and implementation of mental health screening tools 	https://www.acponline.org/practice-resources/quality-improvement/chronic-pain-and-safe-opioid-prescribing/pain-assessments-and-mental-health-screenings	Free	No CME/MOC
Annals In the Clinic: Substance Use Disorders	- Clinical overview of substance use disorders, focusing on epidemiology, prevention, diagnosis, complications, and management.	http://annals.org/aim/article/2511007/substance-use-disorders	Free	1.5 CME/MOC
Pain Management in 2017 (Internal Medicine Meeting 2017)	<ul style="list-style-type: none"> - To learn complex nature of pain - Tools to assess pain/other symptoms - Chronic pain-common problem - Guidelines for Rx opioids in non-cancer pain 	https://www.playbackacp.com/857-123	\$25 video/\$20 audio/or purchase as part of a package	1 CME/MOC
Safer Opioid Prescribing for the Generalist: Initial Patient Evaluation, Interval Follow-up, and Troubleshooting (Internal Medicine Meeting 2017)	<ul style="list-style-type: none"> - What initial history, risk assessment, and documentation are important to perform before prescribing opioids? - Which patients are good candidates for opioid analgesics, and which are not? - How should patients taking opioids be monitored, and how often? Are there recommendations for documentation to help limit prescriber risk? 	https://www.playbackacp.com/857-124	\$25 video/\$20 audio/or purchase as part of a package	1.5 CME/MOC

	<ul style="list-style-type: none"> - When should abuse or diversion be suspected, and how should it be managed? - What strategies are most efficacious to safely stop prescribing opioids? - How should a provider set goals collaboratively for improvement in function? - When opioid use disorder is identified, what treatment options are available? What role does the primary care provider play? - For which patients is a prescription of naloxone appropriate and how is this best utilized to reduce the risk of accidental opioid overdose death?
